Spring 2018

PARASNAP® - THE INNOVATIVE LAMP MOUNTING SYSTEM BY PARAT.

Innovative, practical and absolutely safe: the certified PARASNAP® Ultralux Pro lamp mounting system – for easy attachment of any PARAT lamp to your safety helmet.

Something only PARAT offers: the exclusive lamp mounting system is a reliable companion in demanding jobs. You have both hands free, whereas the lamp attaches firmly to the helmet and provides light exactly where it is needed and at any desired angle. The PARASNAP® Ultralux Pro mount is DGUV-certified according to DIN EN 433:2008 – and is extremely reliable and safe to use.

In addition, PARAT keeps you well protected in an emergency situation: in case the helmet lamp should get tangled up in a hazardous situation, the integrated deadlock function is activated and releases the helmet mount (according to DIN EN 433:2008 requirements) to free the trapped person.

Easily withstands heat and extreme environmental conditions: the PARASNAP® Ultralux Pro is made of sturdy PA 66 polyamide and thus becomes especially durable. However, despite the robust material, the product must also provide ease of use: every lamp can be easily clipped into place at a touch. This is made possible by a perfect combination of magnetic attraction and mechanical locking.

PARAT, as an expert for safety lamps, also considers the individual needs of any member of an emergency team: this is why the PARASNAP® Ultralux Pro is available both for right-side and left-side helmet mounting. The lamp mounting system is compatible with many standard DIN helmets and is certified to be mounted on the helmet types Dräger HPS 4300, Schuberth F120 pro, F130 and Colman AL-EX. Certifications for the models Rosenbauer HEROS smart & titan as well as Dräger HPS 4500 can be provided on request.

One base unit, many options: the mounting system allows for attachment of further working devices such as a helmet headset. PARAT also recommends to mount its own-brand explosion-proof safety lamp on your helmet to provide you with the optimum equipment for any kind of job: so that everyday heroes can always rely on safe light even under the most difficult conditions.

The PARASNAP® Ultralux Pro is available at any PARAT dealer. Please find an easy-to-use dealer search and further details about PARAT's range of safety lamps and the PARASNAP® system on the PARAT Lighting website at: www.lighting.parat.de.
