

IT – SOLUTIONS FOR EDUCATION & TEACHING

MANY ARE SMART - PARAT IS MORE

Mobile Premium solutions for industry, education and health care

When it comes to mobile storage solutions for charging, syncing and protecting IT equipment, PARAT - as leader in this segment - provides customers with a tailor-made portfolio for any partner and platform.

At PARAT, 75 years of experience in developing and manufacturing Premium tool cases combine with comprehensive technical expertise in plastics processing. This is the basis upon which highly innovative products such as customized, portable tool cases and transport solutions are developed, which even allow easy integration of any VDE-compliant IT and electronic components. The term 'premium quality' of PARAT products in this connection stands quite literally for uncompromising sophistication and excellent service.

We would like to take this opportunity to thank you for the confidence you have placed in us and our products. Please rest assured that we will continue to work consistently on innovations and improvements - down to the last detail.

For 75 years, tomorrow and in the future!

The PARAT Group's Executive Management

GERMAN ENGINEERING

A high standard of quality, extensive development approaches, strictest quality monitoring, the exclusive use of top-quality materials and always ready to listen to the requirements of our customers. This has always been PARAT's philosophy from the very beginning and it is our ambition to do so in the future.

1945

1945-10-8 FOUNDATION

The brothers Martin and Heinz Schönenbach establish the leather goods factory Schönenbach OHG in Remscheid. Start-up of the leather bags production line.

1993

1993 THE MOBILE OFFICE

The product portfolio is extended to include storage solutions for IT equipment.

2004

2004 THE EDUCATION SEGMENT

With the extension of the product portfolio for the education sector, new requirements are placed on the products: Now, the storage solutions must allow for the simultaneous charging, managing and transporting of IT equipment.

2007

2007 THE MULTIDOCK

New digital helpers come along as handy devices such as iPod, iPod Touch and iPhone and complete the currently used equipment. To this end, developers at PARAT design a Multidock system that enables users to manage up to 20 devices.

2011

2011 NEW LAPTOP AND MEDIA CART LINE

With the PARAPROJECT® media and notebook carts, PARAT serves the market with flexible IT stations.

2012

2012 THE MILESTONE

With the launch of the first series cases for up to 16 iPads, PARAT has set a further milestone in its product history.

2018 SERVICE DRIVE

New additional capacities for development and production provide an even better service and ensure the highest product quality.

PREMIUM PRODUCTS. PREMIUM QUALITY.

BEST PARAT QUALITY

Durability that impresses.

We exclusively use the most durable and hard-wearing materials when producing our high-class system cases in best workmanship - the manufacturing follows the highest standards of energy management (ISO 50001).

FUNCTION & DESIGN

Practicality that really shows its stuff.

A perfect match: well-thought-out functionality and exclusive design go hand in hand at PARAT - right down to the last detail.

CLEVER STORAGE SYSTEMS

Inner values that win you over.

Everything ready to hand and everything at its place: Thanks to our patented and well-proven system solutions, time-consuming searches have become a thing of the past.

EXCHANGEABLE SPARE PARTS

Sustainability that endures.

Important wear parts such as locks, hinges and handles on your transport case solutions can be quickly and easily removed and replaced, if need be.

PARAT'S REPAIR SHOP

A service that will excite you.

Take advantage of the service offered by the in-house repair shop at PARAT. Our experts are always available for you. We will be happy to provide you with a lifetime repair service or tailored service concepts under a tender procedure.

EXCELLENT SERVICE

Solutions that help you move forward.

From the warranty on our Premium transport solutions to personal advice by our expert staff: You can fully rely on PARAT - anywhere and anytime.

PARAPROJECT® CASE

HIGHLIGHTS*

CHARGING MANAGEMENT - 4 OPTIONS

charging and
wireless management

charging via
central USB charger

charging and
syncing via cable

charging via one
original power supply

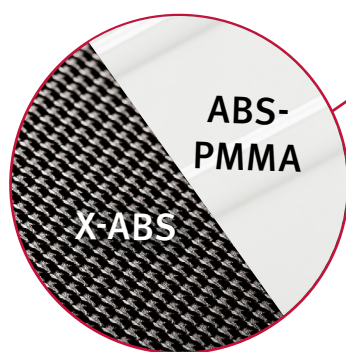

HANDLING

The telescopic handle, extendable up to one meter, and side-mounted handles allow for convenient transport of the case, while built-in combination locks protect the case content from unauthorized access.

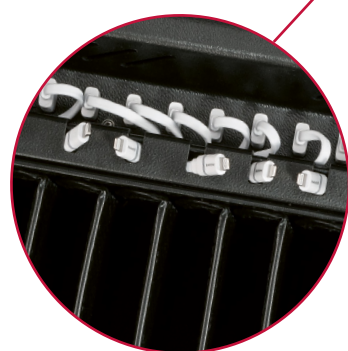

STURDY CASE SHELL

The case shell is either made from scratch-proof X-ABS softtouch or UV-proof ABS/PMMA plastic.

EASY MOVE

The low empty weight combined with the 4-castor-concept "EasyMove" make child's play of handling the cases.

CABLE ROUTING

Tangled mess of cables is a thing of the past! All case systems with USB charging cables enable a clean and easy cable management thanks to USB ports connected in series plus cable routing channels. If required, the cables can be quickly and easily replaced.

EXTRA COMPARTMENTS FOR ACCESSORIES

Compartments and pockets inside the case lid provide plenty of storage space also for small parts such as stylus, adapter or cables.

PROTECTION FROM OVERHEATING

Integrated fans or vent holes in the case bottom and lid ensure optimum air circulation. In addition, a temperature sensor prevents overheating of the case at temperatures above 50° C.

SMART TIME AND CHARGING MANAGEMENT

All case systems charge the devices either via smart USB charging management or original power supply units. Moreover, a programmable charge-timer protects the devices against overcharging and, at the same time, can deliver power savings.

PUSH-IN COMPARTMENTS

Tidying made easy! Whether fixed or flexible: Padded push-in compartments easily stow away up to 20 tablets, notebooks and chromebooks and securely hold your devices in place. Our new Plus models with plug-in slots provide even more flexibility and storage space.

ADDITIONAL STORAGE SPACE

Storage compartments integrated into the case body offer additional storage space as well as ports for connecting Access Point, Apple TV or master device. This allows you to have your IT equipment ready to hand at all times!

COMPATIBILITY

The PARAPROJECT CASES are compatible with iOS, Windows and Android operating systems.

iOS

Windows

PARAPROJECT® CASE

ELEGANT DESIGN MEETS SMART FUNCTIONS

FOR TABLETS

BENEFITS AT A GLANCE:*

- Robust & safe: the case shell made from X-ABS or ABS-PMMA plastic, together with its extremely hard-wearing aluminum frame, makes for the highest durability - and reliably protects the case content against theft thanks to its integrated combination lock.
- Easy handling: the 4-fold telescopic handle plus ball-bearing castors make transport of the case child's play.
- Smart function: allows for easy charging and syncing of your devices via central USB interface inside the case, even when closed.
- Best equipped*: the cases come with a programmable charge-timer and a central power supply unit.
- Neatly stowed away: the fully padded case bottom and sturdy push-in compartments made from ConPearl® material make sure that your tablets and co. will always be safe.

Get more details, technical data sheets and user videos online at it.parat.eu or see under 'product matrix' in this catalog on page 22/23.

* depending on model

PARAPROJECT® CASE

KIDSCOVER VERSION

The clever PARAPROJECT® KidsCover cases have been especially designed for use in nursery and primary schools and allow to charge, sync*, transport and protect up to 20 tablets.

The extremely durable KidsCover plastic covers are easily stowed away in the cases, reliably protect sensitive devices against external influences and minimize the risk of cracked screens - should the tablets fall to the ground.

KidsCover protective cases for iPad devices are available as accessories! it.parat.eu

The KidsCover protective cases are compatible with all iPad generations from generation 4 and mini (except iPad Pro) and are available in orange, green, blue and black.

BASKET VERSION

The PARAPROJECT® CASES BASKET are clever charging, syncing and transport system cases for tablets or iPad devices. The cases are equipped with two or three tablet baskets, depending on model. Each basket accommodates up to five tablets/iPad devices up to 10.5" in separate slots. The baskets come with a practical, fold-down carry handle and can be quickly and easily removed and re-installed. They are ideally suited for learning and working groups from the health care, industrial and educational sector.

Get more details, technical data sheets and user videos online at it.parat.eu or see under 'product matrix' in this catalog on page 22/23.

PARAPROJECT® CASE

ELEGANT DESIGN MEETS SMART FUNCTIONS

FOR LAPTOPS AND CHROMEBOOKS

The PARAPROJECT® cases are ideally designed for transporting and charging ten notebooks, ultrabooks or chromebooks up to 15.6". The extremely durable case shell optimally protects the devices, additional cables required can be easily stowed away. Whether on four wheels, as a trolley or carried by its handles on both sides - the lockable cases will help you keep mobile thanks to many variable transport possibilities.

BENEFITS AT A GLANCE:*

- Robust & safe: the case shell from X-ABS or ABS-PMMA plastic in combination with an extremely hard-wearing aluminum frame provides the highest level of durability - and reliably protects the case content from theft thanks to its integrated combination lock.
- Easy handling: the 4-part telescopic handle plus ball-bearing castors make transport of the case child's play.
- Smart functions: allows for easy charging of the devices, even with the lid closed.
- Best equipped: each case comes with a programmable charge-timer and a central power supply unit.
- Neatly stowed away: the fully padded case bottom and sturdy push-in compartments made from ConPearl® material make sure that your laptops and chromebooks will always be safe.

PARAPROJECT® CASE

SIZE OPTIONS

SMALL

MEDIUM

LARGE

Sustainability begins with the first mark on a piece of paper

We are convinced that: anyone who wants to act in a sustainable way needs to consistently adjust its product designs accordingly, right from the start – from the first scratch through to the completed design. This helps make sure that our solutions will allow easy repair or dismantling later on.

Our supply chains and materials – geared towards sustainability

We take special care about where our raw materials and semi-finished products come from, how long they have to be transported – and how their recyclability potential looks like. Thermoplastics and aluminum extrusions, for example, are being 100% recycled. The major part of our production materials comes mainly from Europe – with regard to the end weight of all PARAT products, this is an average of more than 90 percent. However, as with most of the manufacturing companies, we also need to source certain components, e.g. electronic components, from suppliers outside Europe. Should those become defective, however, they will not be just disposed of or returned, but correctly repaired by our in-house repair shop.

You can't become sustainable overnight

Only a long-lasting product is really a sustainable one. This is the reason why we put all our products through the acid test before shipping them. We conduct, for example, simulation tests for case lid movements and repeat them thousands of times, while running wheels on test benches are completing countless kilometers. In addition, we carry out demanding voltage, fire and climate tests – and also the built-in electronics have to stand the test on testing devices especially designed for this purpose.

With us,
SUSTAINABILITY
is written in capital
letters.

Sustainability shows itself in many details

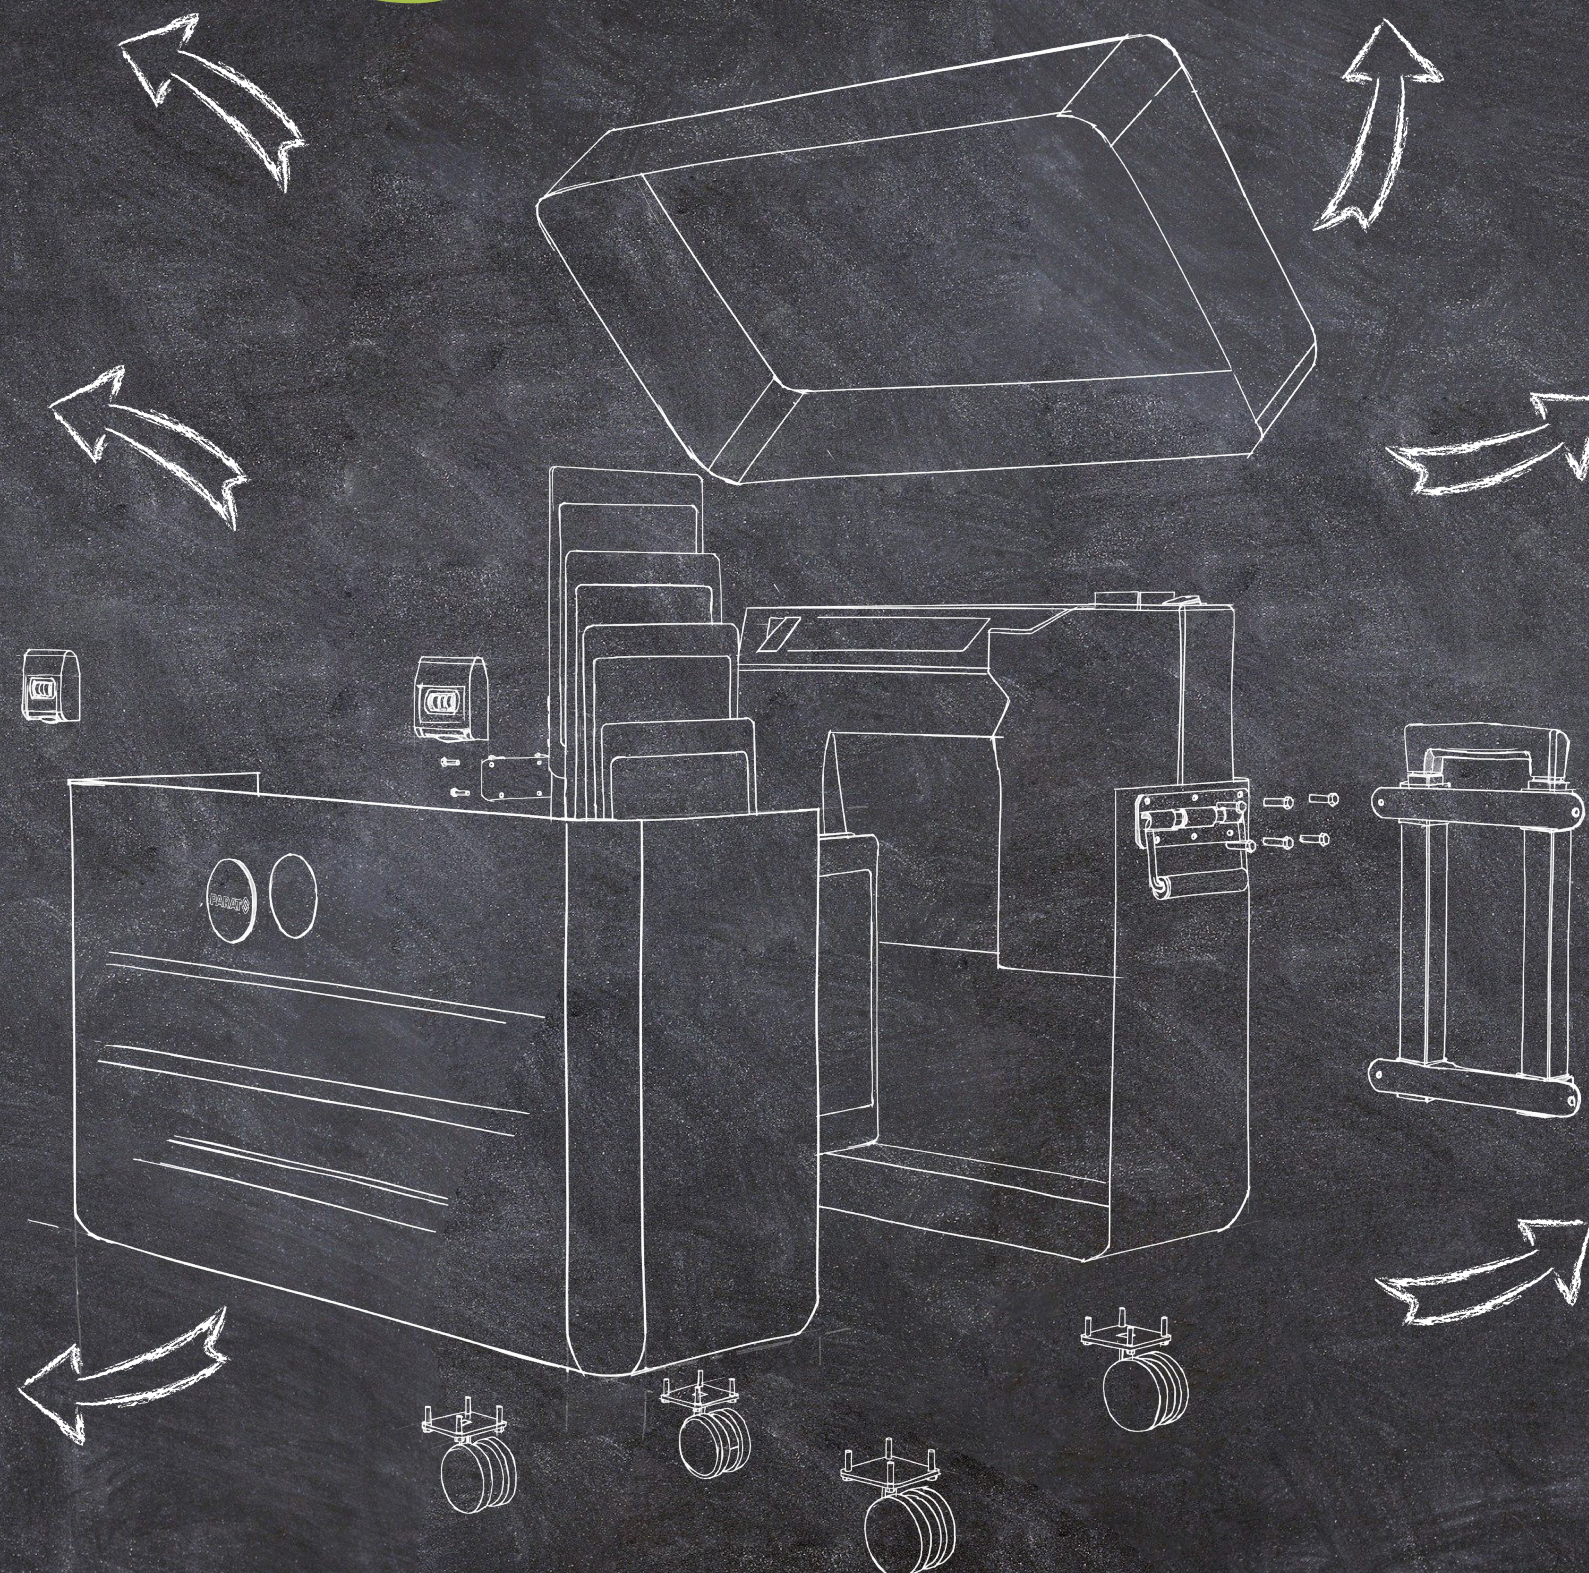

Our case systems allow you to charge your stored devices precisely when the power generated from renewables is at its highest in the grid. This is made possible by integrated timer solutions.

Sustainable production means to save resources

Rest assured: products from PARAT are manufactured in Europe. Our production sites in Germany and Romania are certified according to the strict EN 50001 standard. This requires for instance to constantly look for all the potential for energy savings. A challenge that we love to adopt – in this field we focus on the most advanced heating and insulating technologies to minimize heat loss at our sites. Our reject rates during our production processes are clearly below one percent. In addition, we have all our production waste recycled. All those waste materials result in so-called regrind material, which in turn, with a share of up to 20%, is involved in the production of new semi-finished products. We will also reuse scrap from aluminum profiles and ensure its recycling in collaboration with our suppliers.

We're working towards a sustainable partnership with our customers

For us, sustainability does not end at the factory gates: if anything goes wrong with the device while in use, our in-house repair shop will be happy to replace the defective components. This covers both the case shell and the interior fitting as well as built-in electronics. Of course, it is also very easy to exchange specific components yourself: a call is all it takes – and we will immediately dispatch the spare part required.

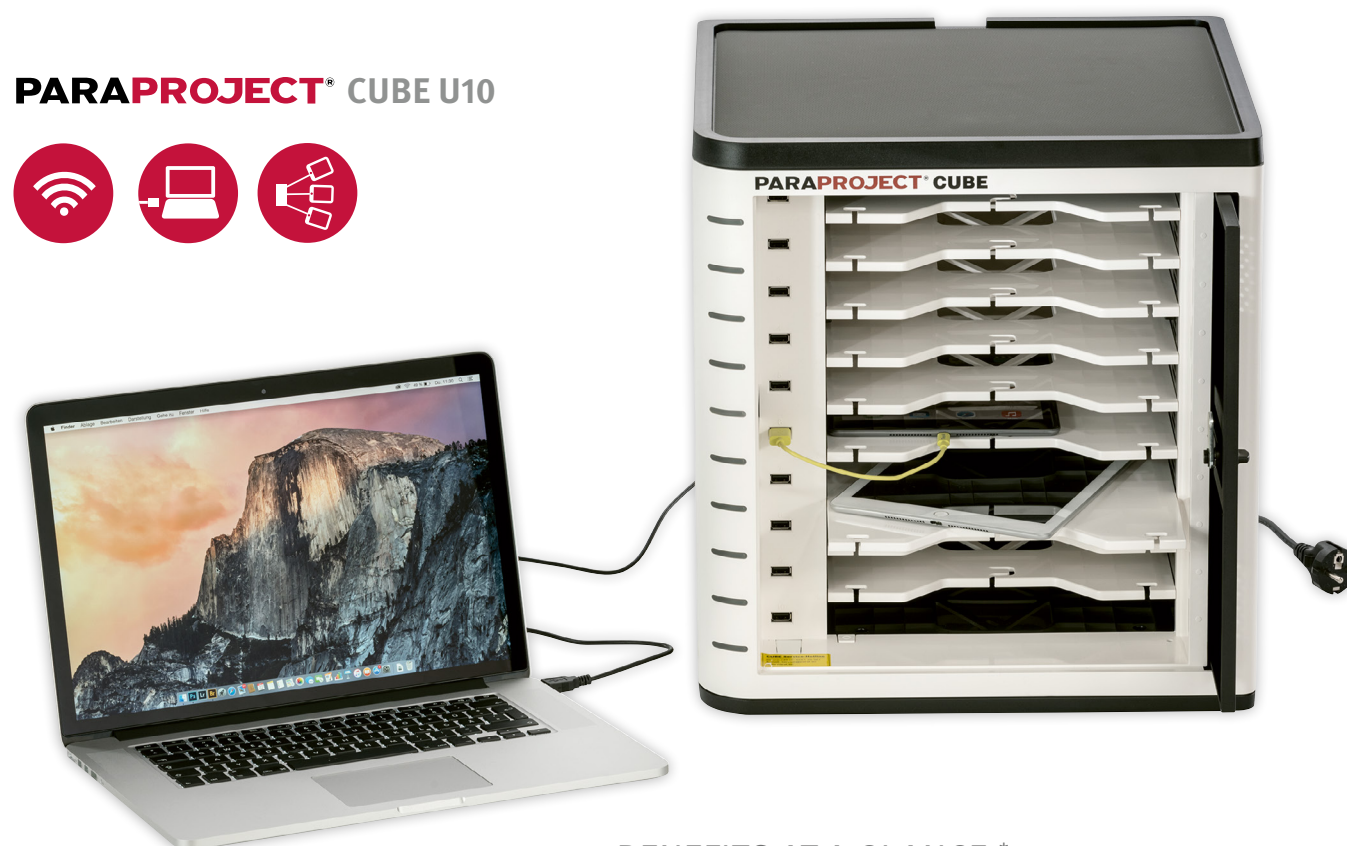

PARAPROJECT® CUBE

COMPACT CHARGING AND SYNCING STATION FOR UP TO TEN TABLETS

Whether in the staff room, classroom or in a hospital ward.

With the PARAPROJECT® Cube, PARAT has created a space-saving solution to store your tablets. Designed to be mounted on the wall and upgradeable for up to 3 modules, the Cube provides users with outstanding flexibility with regard to possible applications. Portable baskets can be added as a supplement in order to transport your tablets from place of storage to place of action. The lockable Cube protects your devices from unauthorized access and guarantees reliable charging of the batteries. Automated synchronization makes for updated data at all times. Equipped with an active fan, the Cube offers plenty of space to hold up to 10 tablets.

PARAPROJECT® CUBE U10

BENEFITS AT A GLANCE:*

- Ten horizontal slots with LED display show the battery's current state of charge and sync status per tablet.
- The fully retractable and lockable door panel securely protects the content against theft.
- The automated synchronization system detects the USB connection to a host PC and automatically starts syncing.
- An optionally available wall mount gives you the option to lock the PARAPROJECT® Cube to a fixed location on the wall and secures it in place.

The PARAPROJECT® Cube is available for iOS, Android and Windows operating systems and offers a variety of cable types.*
Please find more details, technical data sheets and user videos online at it.parat.eu or in this catalog under Product Matrix.

PARAPROJECT® TROLLEY i32 PRO

THE MOBILE CLASSROOM. HAVE ALL YOUR IT
ALWAYS READY FOR USE!

Charging, syncing and storage system for iOS, Android and Windows tablets

The PARAPROJECT® Trolley i32 allows to centrally charge up to 32 USB-loadable tablets and securely holds them in place. Integrated castors make for a smooth ride and allow to transport the trolley plus IT equipment from one classroom to the next – stress-free and conveniently.

BENEFITS AT A GLANCE:*

- The metal and plastic shell makes the trolley extremely robust.
- Fully retractable and lockable door panels securely protect the case content from theft.
- 32 vertical slots for tablets (up to 12.9") plus tablet cases of max. 25 mm provide maximum storage space.
- LEDs on the trolley surface indicate the respective charging status of the tablets.
- The automated synchronization detects the USB connection to a host PC and automatically starts syncing.
- Additional, separately lockable storage compartments offer plenty of space to accommodate laptops and further accessories.

PARAPROJECT® TROLLEY U32

CHARGED DEVICES AT ALL TIMES AND IN ALL PLACES

Charging and storage system for chromebooks, ultrabooks or tablets

The PARAT Trolley U32 from the PARAPROJECT® series is a handy cart and mobile charging station all in one. Three easy-pull drawers offer plenty of space to hold up to 32 chrome/ultrabooks or tablets in separate slots integrated in the cart.

PARAPROJECT® TROLLEY U32

BENEFITS AT A GLANCE:*

- The metal and plastic shell makes the trolley extremely robust.
- The PARAPROJECT® U32 is lockable and comes with locking castors to provide optimal protection for your devices.
- Three easy-pull drawers offer plenty of space to store up to 32 chrome-/ultrabooks or tablets in separate slots integrated in the cart.
- The trolley is connected to an external socket via main cable; the charging process can be individually started by pushing the on/off button.
- In addition, the cart provides a practical working desktop on its surface.
- A separately lockable door panel is located on the back of the cart and shows all connections needed.

PARAT ON THE EDUCATIONAL MARKET.

PARAT products are exclusively sold by our authorized dealer or distributor network. This is the only way to provide our customers with all the relevant components needed for successful implementation of the 'Digital Classroom' concept – in a reliable and holistic way. At the same time, we have defined specific shopping baskets in close collaboration with our expert partners to facilitate procurement processes for you. In addition, we continuously coordinate our activities with our

sales partners to perfectly meet your technical requirements. After all, our aim is to select the suitable components that best meet your needs – following a great experience and knowledge of successful mobile device deployment: from the hardware to WIFI infrastructure right up to device management and the respective accessories.

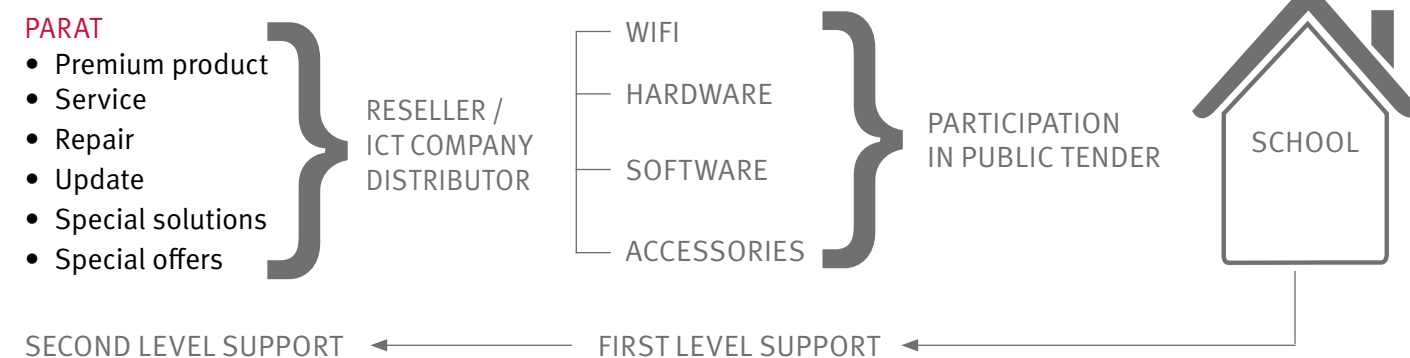

YOU NEED DETAILED INFORMATION
TO PREPARE AN INVITATION TO TENDER?

Take the opportunity to learn more online at it.parat.eu and refer to our special leaflet. Here you can obtain information about the many procurement options within the framework of a tender procedure and how to get support on your way to digital learning with tablets and laptops.

You are already using digital media successfully in class and are planning an upgrading – or you, as an educational authority, do not yet know which solution best suits your needs?

Then come and test our products at us or with us! Together with our sales partners, we offer maintaining bodies and schools the opportunity to test our products before you buy them. Experience our products live at your school or within your school staff. Take advantage of our extensive market knowledge and our partners' expertise.

After putting the products into use in day-to-day school life, our customer support team together with our well-trained sales partners are always available to assist you. This will ensure smooth school operations with your digital terminal devices.

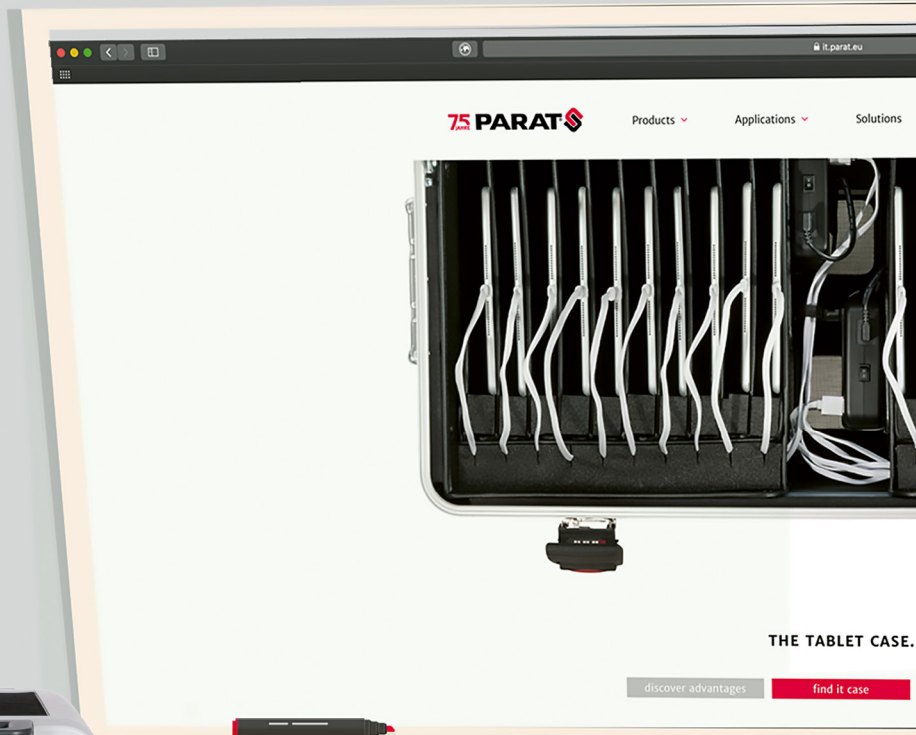

PREMIUM PRODUCTS. PREMIUM SERVICE.
WE WILL BE GLAD TO ADVISE YOU!

Premium quality by PARAT means: excellent service paired with expert consulting.
We will be glad to advise you! +49 8583 29 444 · it-cases@parat.eu
